### Weight for rate calculating:

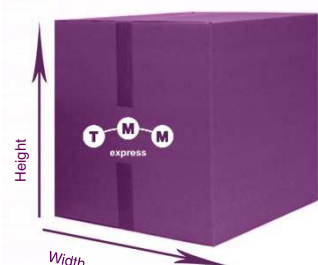

If the volume weight exceeds the actual weight of the goods, shipping cost is calculated by the volume weight.

### Formula for calculating of volume weight:

length(m) \* height (m) \* width (m) = the rounded result upwards the third figure after coma, X 250 = volume weight.

### Example:

length 0,33 m, height 0,33 m, width 0,33 m Calculation: 0,33 X 0,33 X 0,33 = 0,036 X 250 = 9 kg.

Tariffs are valid from 02.07.2018, quoted in UAH, VAT including, without fuel surcharge neither ITLL charges. Tariffs are the subject to changing by TMM Express. Updates regarding fuel surcharges, weight and dimensions restrictions, as well as additional information about Insurance Service and Special Services are available upon request to Customer Service Department: 0 800 50 05 75
